vianet

Managed WIFI

COMPLETE END-TO-END SOLUTION

Vianet's Business Class Managed WiFi is an ideal solution for ensuring that your business has wireless coverage wherever you might need it to be. Whatever the size of your premises, Vianet can build a solution that works with your existing internet connection to ensure you have reliable and performant coverage.

## Our Managed Wi-Fi, Utilizing Premier Wi-Fi Technologies

Using high-performance and scalable access points, combined with an enterprise-level management tool, our Managed WiFi service delivers exceptional wireless coverage both indoors and outdoors that is easy to deploy, competitively priced, and tailored to your unique needs.

With our Business Class Managed WiFi solution, you can build a wireless network as big or small as you want, with the option to expand as your needs change. Our solution can support anything from a small business to a high-density setup with numerous users.

The benefits of using our Managed WiFi system are:

- *Devices roam seamlessly between Access Points, with multiple SSID support.*
- *Can manage flexible configurations for any sized deployments.*
- *Optional personalized landing page.*
- *Provider support for guest connectivity issues.*
- *Apply different bandwidth rates (download/upload).*
- *Limit total data and duration of usage.*
